RESEARCH:

MAJOR RESEARCH INTERESTS:

Biology and epidemiology of *Bordetella pertussis*
 Development, efficacy, safety, and reactogenicity of viral and bacterial vaccines
 Diseases due to anaerobic bacteria and their toxins (*C. botulinum*)

GRANT SUPPORT:

Postdoctoral Fellowship Grant: Determinants developing bacterial flora in neonates. National Institute of Allergy and Infectious Diseases, National Institutes of Health. Full salary & supplies	F22 AI0012 1974-1975
Principal Investigator: Pharmacokinetics, efficacy and safety studies of new----- (b)(4)----- . ----- (b)(4)----- . (Approximately --(b)(4)(b)(6)--)	1978-2003
Coinvestigator: A ----- (b)(4)----- ----- (b)(4)----- .(Approximately (b)(4)(b)(6))	
Coinvestigator: Comparative efficacy and reactogenicity of simultaneous administration of MMR, DTP, and OPV vaccines in 800 infants. Contract awarded by Department of Health Education and Welfare, Centers for Disease Control. (\$464,582)	200-81-0624 1981-1984
Coinvestigator: Evaluation of a three-versus four-dose primary immunization schedule of diphtheria-tetanus- pertussis in 500 children. Contract awarded by Department of Health Education and Welfare, Centers for Disease Control. (\$455,785)	200-83-0613 1981-1984
Consultant: Evaluation of safety, immunogenicity and compatibility of novel vaccines in pediatrics. Multiple study contracts in collaboration with Pennridge Pediatric Associates, Sellersville, PA	1986-1997
Program Director: Infectious complications of burns in children.	1993-1995
Competitive fellowship award of Pediatric Infectious Diseases Society to Gail L. Rodgers, M.D. (b)(4)(b)(6)	

Institutional and Pharmaceutical Grants. (Approximately (b)(4)(b)(6))	1993-2001
Oversight Advisory Committee Member & Principal Site Investigator: A multicenter case-control study of nonsteroidal antiinflammatory drug use as a risk factor for group A streptococcal invasive infection in children. The Slone Epidemiology Unit, Boston U School of Medicine & the National Center for Infectious Diseases, Centers for Disease Control & Prevention. (Advisory Grant & fee/case contributed)	1996-2000
Principal Site Investigator: A multicenter Phase III, randomized placebo controlled trial of efficacy of -----(b)(4)-----, intravenous in treatment -----(b)(4)-----, Orphan Drug Program of the U.S. Food and Drug Administration. (Approximately (b)(4)(b)(6)).	1997-2002
Principal Site Investigator: Open-label administration of human botulism-immune globulin. California Department of Health Services.	2000-2003
